Round Rock, TX 78681  
Office (512) 255-8868  
Fax (512) 255-8869

Anselmo Unite, M.D. Debaroti Addy, M.D.

We know having a baby is a wonderful experience, and chances are, most of your free time will be gone! Before all that happens, please take a moment to read and address the following:

- We will file claims under the mother's insurance for the 1<sup>st</sup> month, until the baby has been added to the insurance as a covered dependant. After the 1<sup>st</sup> month, you will be responsible for any payments until your child is covered under the insurance.
- As soon as possible, please contact your insurance company and your employer's Human Resource Department to add the baby. (Most insurance companies require this to be done before 31 days after birth.)
- If your plan requires that you specify a Primary Care Physician, please ensure that you select either Dr. Unite or Dr. Addy as the designated pediatrician.
- If your plan does not provide well child care, or has limited coverage, we have a free immunization program. Please inform the front office staff, and you will be provided paperwork to complete before the doctor sees your child.
- Please contact your insurance company regarding the coverage of Prevnar, procedure code 90669. This is a vaccine normally given at 2, 4 and 6 months of age, followed by a fourth shot at 12 to 15 months. Since this vaccine, is costly, and not state mandated, some insurance carriers do not cover this immunization.

Thank you for your cooperation in this matter, and welcome to our office!
