Round Rock, TX 78681
(512) 255-8868

We know having a baby is a wonderful experience, and chances are, most of your free time will be gone! Before all that happens, please take a moment to read and address the following:

- As soon as possible, please contact your insurance company and your employer's human resources department to add the baby. (Most insurance companies require this to be done before 31 days after birth.) **Please inform us when making your first appointment which insurance you will be adding your baby to.**
- If your plan requires that you specify a primary care physician (PCP), please ensure that you do so.
- If your plan does not provide well child care, or has limited coverage we have a free immunization program available. Please inform the front office staff and you will be provided paperwork to complete before the doctor sees your child.

Welcome to our office!
